

City of Vancouver Critical Areas: Fish and Wildlife Habitat Conservation Area

-  Vancouver City Boundary
-  Urban Growth Area
-  Roads
-  Taxlots
-  Water
-  Priority Habitat Areas
-  Priority Species Area
-  Adopted Riparian Buffers

Priority Habitat and Species Areas are specific habitats identified by the Washington State Department of Fish and Wildlife with unique or significant value to a large number of species. These habitats may consist of unique plant species or specific habitat features like cliffs or oak habitat.

Riparian Buffers are regulated areas within a horizontal distance from the ordinary high water mark of water bodies which include lakes, streams, or rivers.

City of Vancouver Critical Areas: Geologically Hazardous Areas

-  Vancouver City Boundary
 -  Urban Growth Area
 -  Taxlots
 -  Roads
 -  Water
 -  Severe Erosion Hazards
- Landslide Hazards**
-  Historical unstable slopes
 -  Potential unstable slopes
 -  Active unstable slopes

Severe Erosion Hazards: Areas with soils identified as having a severe erosion hazard by the 1972 USDA Soil Conservation Service Soil Survey of Clark County Washington.

Landslide Hazards : Areas mapped by the Washington State Department of Natural Resources (DNR) and the U.S. Geological Survey (USGS) with slopes greater than 15% and soil and geologic characteristics that are susceptible to landslides.
