**SECTION 10.** Vancouver Municipal Code Section 20.450.030, as last amended by ordinance M-4255, section 10, is hereby amended to read as follows:

**20.450.030 Uses.**

A. *Types of uses.* For the purposes of this chapter, there are four kinds of use:

1. A permitted (P) use is one that is permitted outright, subject to all of the applicable provisions of this title.
2. A limited (L) use is permitted outright providing it is in compliance with special requirements, exceptions or restrictions.
3. A conditional use (C) is a discretionary use reviewed through the process set forth in Chapters 20.245 and 20.210 VMC, governing conditional uses and decision-making procedures, respectively.
4. A prohibited use (X) is one that is not permitted in a zoning district under any circumstances.

B. *Use tables.* Lists of permitted, limited, conditional, and prohibited uses in Open Space Districts are presented in Tables 20.450.030-1 and 20.450.030-2. Specialized open space uses and activities are set forth in Table 20.450.030-1. Uses described in the Use Classification section (Chapter 20.160 VMC), are set forth in Table 20.450-2. Special limitations on uses are set forth in VMC 20.450.050.

**SECTION 11.** Chapter 20.895 of Vancouver Municipal Code, adopted by Ordinance M-3643, is hereby amended by adding a new Section 20.895.110, to read as follows:

**20.895.110 Fossil Fuel or Cleaner Fuel Storage and Handling**

A. Purpose. The purpose of these standards is to minimize the risk of spill or discharge of fuels into groundwater or the waters of the state; to promote public health and safety and avoid and minimize impacts to nearby properties from fire or explosion or adverse air emissions; to support a reduction in greenhouse gas emissions and a transition to renewable fuel and energy production consistent with Federal, state and local targets; and to protect and preserve fish and wildlife habitat areas to ensure viable Tribal fisheries consistent with Treaty fishing rights.

B. Applicability. The standards in this section apply to:

1. Bulk Fossil Fuel Storage and Handling Facilities

2. Cleaner Fuel Storage and Handling Facilities

### 3. Small Fossil Fuel or Cleaner Fuel Storage and Distribution Facilities

C. Standards – Non-Capacity Improvements. The City may approve activities or structures for one or more of the following purposes as a limited use, provided there is no increase in baseline capacity:

1. Maintenance repair, or replacement.
2. Improvement of the safety or security of the infrastructure, including seismic upgrades.
3. Decrease in air or water emissions.
4. Allow the facility infrastructure or buildings to meet new regulatory requirements.
5. Addition of accessory structures or activities that do not add to the baseline capacity of the facility.

The applicant for non-capacity improvements shall specify the baseline capacity for the facility as of the date of this ordinance per subsection E.2 below.

D. Standards for New or Expanded Small Fossil Fuel or Cleaner Fuel Storage and Distribution Facilities.

1. The applicant shall document the existing baseline, and any proposed additional storage capacity and the fuel type(s) to be stored. Documentation shall be consistent with subsection E.2 below.

2. The Planning Official shall require seismic upgrades to existing facilities as a condition of the land use permit.

3. The applicant shall obtain approval of comprehensive spill prevention and fire response plans to the satisfaction of the Planning Official and Fire Marshal.

4. New small fossil fuel or cleaner fuel storage and distribution facilities shall be located at least 1,000 feet away from residentially zoned properties.

E. Standards for Bulk Fossil Fuel Storage and Handling Facilities – New or Capacity Expansion.

1. New Facilities. New Bulk Fossil Fuel Storage and Handling Facilities are prohibited, regardless of size.

2. Baseline Established. The baseline for storage, transportation, and transshipment facilities is established by the following information available as of November 3, 2022. Storage baseline capacity shall be established using Washington Department of Ecology industrial section permits and oil spill prevention plans or other verifiable documentation. Transshipment and transportation facility baseline is established through the most recent spill prevention plans approved by the Department of Ecology or where a local permit documenting such facilities has been approved more recently. If an existing facility does not have an established refining or storage baseline from a past industrial section permit or spill prevention plan, the baseline must be established as part of a permit application.

3. Expansion of Bulk Fossil Fuel Storage and Handling Facilities is allowed up to 15 percent increase above the baseline capacity if converted to Cleaner Fuels, as defined by VMC 20.150.040A, and subject to the requirements of Section F below.

F. Standards for Cleaner Fuels Storage and Handling Facilities – New or Expansion.

1. New or Expanded Cleaner Fuel Storage and Handling Facilities are allowed subject to a conditional use permit if no larger than 1 million gallons of cumulative storage, on a site 3 acres or less in size, and if located at least 1,000 feet from residential zoned land. Size cannot exceed the smaller of 1 million gallons or site acreage 3 acres. Such facilities shall meet spill prevention/fire response, seismic upgrade, GHG assessment, and annual reports in subsection 3.b et seq.

2. Existing Bulk Fossil Fuel Storage and Handling Facilities may be converted to Cleaner Fuels, as defined by VMC 20.150.040A, as a limited use, subject to the requirements of subsection 3, below.

3. Existing Bulk Fossil Fuel Storage and Handling facilities converted to Cleaner Fuels may be expanded, subject to approval of a conditional use permit and compliance with the following criteria:

a. Total or partial conversion of an existing fossil fuel storage and handling to cleaner fuel infrastructure is allowed. If a facility is converted the facility may be increased by up to 15 percent above the baseline capacity. The expansion shall be in proportion to the amount of cleaner fuel storage. For example, if 25% of the

facility is converted to cleaner fuels, the storage and handling infrastructure may expand by 3.75%. If 50% of the facility is converted to cleaner fuels, storage and handling infrastructure may expand by 7.5%. If 100% of the facility is converted into cleaner fuels storage and handling, then 15% of the infrastructure may be increased.

b. If a fossil fuel storage and handling facility is partially or fully converted to cleaner fuel infrastructure, that share of the facility used for cleaner fuel storage, transportation, or transshipment of petroleum-based fossil fuels shall be maintained on the overall site; products may be moved to different storage tanks on the site, provided that the cleaner fuel percentage of the total storage is maintained. The applicant shall provide a comprehensive spill prevention plan and fire response plan to the satisfaction of the Planning Official and Fire Marshal.

c. Seismic upgrades pursuant to current building code requirements shall be made to any existing fuel storage facilities.

d. GHG Assessment: Greenhouse gas emissions impacts shall be assessed for expanded facilities. The applicant is responsible to provide an expert evaluation by a qualified professional consistent with the requirements of this code. The evaluation shall document baseline lifecycle greenhouse gas emissions from the facility, net increases in lifecycle greenhouse gas emissions, and mitigation of greenhouse gas emission increases. Lifecycle emissions shall be quantified as defined in 42 U.S. Code § 7545. The Planning Official shall require mitigation to

address the project's direct greenhouse gas emissions and may require mitigation to address the project's indirect emissions. The assessment shall address mitigation for net increases in greenhouse gas emissions, which may include, but is not limited to, one or more of following: onsite efficiency improvements, carbon capture and storage, purchase of carbon offsets from any carbon registry approved by the City or a state agency, implementation of strategies in Vancouver's Climate Action Plan, or other measures approved by the Planning Official. The mitigation may concurrently satisfy any other requirements imposed by county, state or federal governments. Mitigation shall be made conditions of approval, and shall be specific, identifiable, quantifiable, permanent; enforceable; and verifiable.

*e. Financial Assurance in Case of Accidents.* To ensure applicants are able to mitigate the consequences of accidents, proof of financial assurance (such as trust funds, letters of credit, insurance, self-insurance, financial tests, corporate guarantees, payment bonds or performance bonds) shall be provided sufficient to comply with the financial responsibility requirements set forth in any State and federal law applicable to their proposed project. If the applicant relies on an insurance policy for compliance with a State or federal financial assurance requirement, the applicant must add the City of Vancouver as an additional insured as a condition of permit issuance.

*f. Annual Report.* The applicant shall provide an annual report to the Planning Official of the following:

- i. A description of on-site storage capacity including the number of tanks, tank volumes, and products.
- ii. The number of vessel transfers of fuel, both inbound and outbound from the site, the type and quantity of products transferred, and the product destination.
- iii. The number of rail cars transporting fuels, both to and from the site, including a description of the product, volume, and destination.
- iv. The number of trucks transporting fuels, both to and from the site, including a description of the product, volume, and destination.
- v. Documentation that onsite activity is similar to the established baseline of storage and/or throughput.
- vi. Conformity with applicable regional, state, and federal reporting or permit requirements pursuant to laws and rules implemented by Southwest Washington Clean Air Agency, Washington Department of Ecology, US Environmental Protection Agency, and US Energy Information Administration to ensure compliance with the requirements herein.

**SECTION 12. Moratorium terminated.** The moratorium prohibiting the establishment of new, or expansion of existing, large-scale fossil fuel facilities, which was originally enacted by Ordinance No. M-4295, first extended by Ordinance No. M-4323, extended a second time by Ordinance No. M-4335, then extended a third time by Ordinance No. M-4355, and subsequently

extended for a fourth time by Ordinance No. M-4370, is hereby terminated as of the effective date of this ordinance.

**SECTION 13. Savings.** Those sections of any ordinances amended or repealed by this ordinance shall remain in full force and effect until the effective date of this ordinance.

**SECTION 14. Severability.** If any clause, sentence, paragraph, section, or part of this ordinance or the application thereof to any person or circumstance shall be adjudged by any court of competent jurisdiction to be invalid, such order or judgment shall be confined in its operation to the controversy in which it was rendered and shall not effect or invalidate the remainder of any parts thereof to any person or circumstances and to this end the provisions of each clause, sentence, paragraph, section or part of this law are hereby declared to be severable.

**SECTION 15. Effective Date.** This ordinance shall become effective on November 3, 2022, thirty (30) days after its adoption.
